WEMS

Officers Use our Body Cameras to Record throughout their day.

From within their Vehicles, Officers can connect our body cameras to their MDT to Playback and Review Recorded files.
They can Tag & Classify each Video and enter notations.

At the end of their shift, Officers place the cameras into the docking station.
Files are then automatically uploaded Into WEMS.
A status bar displays the upload status of each camera. When Transfer is complete, the files on the camera are deleted and the docking station proceeds to charge the cameras for the next days' use.

All files are uploaded into the officer's evidence folders and are then Encrypted using Sha-256 IACP Standards.

You can choose to store your files in the Cloud or On-Premises.
After files from the cameras are uploaded and managed through WEMS,
they are then stored in either the Cloud or an On-Premises Server.

WOLFCOM®
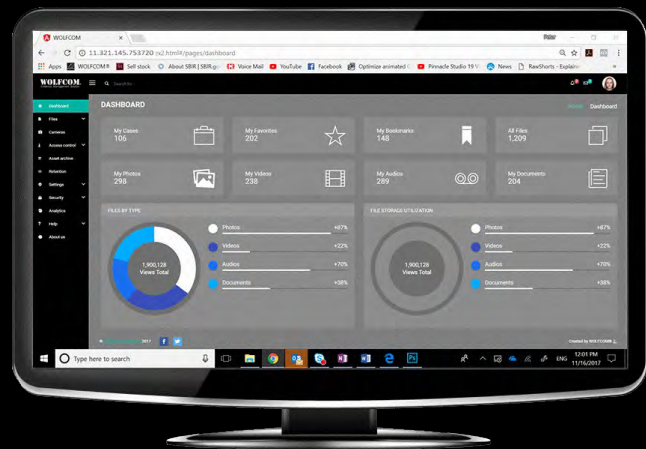

CLOUD STORAGE

Cloud Storage

On-Prem Storage

Advantages of Cloud Storage

- Headache free. No need for IT staff
- We'll take care of everything
- Access WEMS from anywhere in the world
- Easily Share Files with District Attorney

Create Groups and Roles with Assigned Privileges.

Analytics Gives You a Complete Understanding
of Everything within the System.

ASR (Automatic Smart Redaction)
# Video and Audio Redaction Powered by AI (Artificial Intelligence)

WOLFCOM®

WEMS also comes with (optional) **A**utomatic **S**mart Video **R**edaction. ASR can identify and redact faces automatically.

Powered by Artificial Intelligence, ASR automatically detects all faces in the video and, with the click of a button, blurs all of them out in a matter of seconds. Easily redact license plates, private information, objects, and audio.
