

## ANTI-INTRUSION System

SOFTWARE AND HARDWARE SOLUTIONS FOR **HEALTH AND SAFETY AT WORK**

Protects your company with the **XAtlas anti-intrusion system, combined with the alarm centers**

**Control your company and prevent access by unauthorized people.**

Zucchetti Axess develops cabled and radio-controlled turnkey solutions for protection in industrial and commercial environments. All with simple, flexible installation guaranteed by our know-how and experience. The offer is suitable for small environments, where simple, fast accessibility guarantees an integrated system with high performance and top security for small companies, and for large industrial plants, with multiple areas to monitor. Scalable products that can easily be integrated allow for the development of solutions for each monitoring need.

Control

XAtlas | **Software**

## XAtlas II Software

The XAtlas anti-intrusion system can be perfectly integrated with any system CEI-ABI (DEA, ELMO, AXEL and CITEL). XAtlas integrates with new or existing third-party systems, preserving the investment already made.

Mapping the inputs received from sensors on doors and windows on the XAtlas system, it is possible to receive information from the system and control them. By combining the Security module, it is possible to intuitively manage the system by viewing the alarms on an interactive collective plant of the controlled area.

It **integrates your company's anti-intrusion system with our video-surveillance systems.**

## Advantages

### Fast

Evaluate events in real time.

### Safe

Alerts security staff who can then intervene immediately and increase alarm safety.

### Reliable

Receive immediate notification.

### Control

Know who activates/deactivates the alarms.

### Functions

- **Enters** zone alarms;
- **Manages** the list of alarms;
- **Activates/deactivates** the alarm actuators;
- **Detects** thefts or intrusion attempts;
- **Blocks** access at entrances;
- **Can be integrated** with video-surveillance and IP camera systems.
