

# STELA™

## Interactive Multifunction Kiosk

The “Stela” kiosk is an integral part of our reception management solution. Thanks to its many features (22-inch screen with webcam, QR code reader, payment terminal, card reader, printer, etc.), this kiosk will ensure the complete reception of your visitors in the simplest possible way as soon as they arrive.

The terminal is delivered already assembled and equipped to save you time. Its new sleeker, thinner and taller design allows it to attract attention and facilitate all the steps of your visitors’ journey.
